## Directional / Horizontal Drilling MWD Tool Advantages

- State-of-the-Art Technology / Equipment
- 24/7 Technical Assistance
- Factory Training for field engineers and shop technicians
- User Friendly Operations
- 150/175C Operation Temperatures
- Highest MTBF (Mean Time Between Failures)
- Save on Battery Consumption
- Quick turn around on Factory Repair and Maintenance
- Wireless Monitoring Capability
- Remote Monitoring Capability
- High Reliability Cabling
- No License Fees

### Comprehensive Services

Customer support, repair, and calibration are the backbone of Bench Tree Equipment, with all services provided with every Source Technology MWD System. Repair services restore products to their original electronic, thermal, and mechanical specifications. Calibration services are conducted in a state-of-the-art facility that is environmentally controlled for maximizing directional accuracy. Customer support services assist in troubleshooting systems setup issues and aid in analyzing operational failures, leading customers to resolution. All our services are provided in rapid turnaround times, with 24-hours service on surface gear repair and 5-day service on downhole electronics calibrations.

### Real-Time MWD wherever you are

You have the ability for remote monitoring and control management, it is now possible for companies to monitor all drilling operations simultaneously from any remote location.
